EDUCATION

Universitas Pembangunan Nasional "Veteran" Jakarta
Bachelor's Degree of Computer Science, Information System
Cumulative GPA : 3.86 / 4.00

Jakarta, Indonesia
2024 – 2028

EXPERIENCES

KSM Multimedia | *Graphic Design Member* | Jakarta, Indonesia

June 2026 – Present

A student study group focusing on multimedia development and visual communication design.

- Selected as a member of the Graphic Design division to study design principles, typography, and digital asset creation.
- Developed practical knowledge in creating visual elements and managing digital assets applicable to software interfaces and creative projects.

PROJECTS

Smart Public Transport Platform | CodeIgniter4, PHP 8.2, MySQL, RabbitMQ | [Project Link](#) May 2026 – July 2026

- Built **Passenger & Stop Service** microservices with 12+ REST API endpoints for ticketing, real-time crowd monitoring, and IoT integration as part of a 6-person team deploying on Kubernetes.
- Implemented **RabbitMQ event-driven architecture** with 3 background consumers for real-time passenger notifications (ticket purchase, tap-in/out, ML anomaly alerts).

JoKo — Student Team Finder & Event Hub | Kotlin Native, XML Layout | [Project Link](#) May 2026 - June 2026

- Designed and implemented **complete UI/UX** across 13 activities and 10 fragments using XML Layout and Material Design 3, covering authentication, event hub, team finder, bookmark, and profile flows as part of a 3-person team.
- Built **reusable component system** including 14 custom card layouts, chip input fragment, and a consistent dark-theme design system (color tokens, typography, custom drawables) applied across the entire application.

BlessingKost — Boarding House Management Web App | React, Supabase, Tailwind CSS | [Project Link](#) July 2026 – Present

- Built a full-stack boarding house management system (public site + admin panel) using **React + Supabase**.
- Implemented **5 CRUD modules** (rooms, gallery, facilities, testimonials, settings) with row-level security and real-time data sync via React Query.
- Fixed a critical bug causing the site to display stale static data instead of live database data, restoring real-time accuracy.

SKILLS

Languages : HTML/CSS (Tailwind, Bootstrap), Java, Typescript, Javascript (Node.js, Express, React, Next.js, React Router, TanStack Query), Python (FastAPI, Flask, Django), React Native, Kotlin, PHP (CodeIgniter 4)

Database : SQL (MySQL, PostgreSQL, SQLite), NoSQL (MongoDB), Supabase, Firebase

Framework : n8n, Mastra, AI SDK, CodeIgniter 4 , Laravel

Tools : Figma, Git, GitHub, Notion, Postman, Docker, Cloudflare (Workers, R2), Maze, Vercel, Sentry, Google Cloud, Jira, Microsoft Office 365, RabbitMQ, Kubernetes (K8s)

Soft Skills : Communication, Problem Solving, Team Collaboration, Adaptability, Project Management, Creativity, Attention to Detail.
